

The Aroma Spectrum

Ten aromas, the terpenes behind each, and what's in the case right now.

Gas / Fuel

GAS • LOUD, PUNGENT DIESEL AND CHEMICAL FUNK

Pungent diesel, solvent, and aggressive skunk. The loudest jar on the shelf — it announces itself before you open it.

Often associated with heavy, full-bodied, deeply relaxing experiences.

Gas is the one profile that emerges from a balance of several terpenes rather than a single driver — when caryophyllene, limonene, and myrcene/humulene all land in similar amounts, you get diesel.

DRIVER TERPENES

β -Caryophyllene • D-Limonene • Myrcene • α -Humulene

SECONDARY p-Cymene

IN THIS CATALOG • 0

Nothing in this profile right now — ask a budtender.

Fruity / Sweet

FRUIT • JUICY, CANDY, RIPE STONE FRUIT

Berry, stone fruit, candy. The sweetest, juiciest profile — often led by terpinolene's haze-like fruit-fresh character.

Often described as balanced and gently mood-lifting.

DRIVER TERPENES

Terpinolene • β -Ocimene • β -Farnesene

PRIMARY Terpinolene

SECONDARY β -Farnesene, α -Farnesene

IN THIS CATALOG • 3

Positive Mental Attitude ★

\$42 /8th

Cascade Orange

\$28 /8th

Mt. Hood Magic

\$30 /8th

Earthy / Dank

EARTH • DEEP SOIL, MUSK, AND WEIGHT

Wet forest floor, damp soil, fresh-cut mushroom. Grounded and heavy, with an old-school musk that reads as substantial.

Traditionally linked to grounding, restful, body-forward experiences.

DRIVER TERPENES

Myrcene • α -Humulene

PRIMARY Myrcene

IN THIS CATALOG • 2

Jelly Breath

\$— /8th

Meat Stomper

\$32 /8th

Floral / Soft

FLORAL • LAVENDER, ROSE, PERFUMED SOFTNESS

Crushed lavender, rose petal, soft perfume. Delicate and aromatic — the calmest corner of the spectrum.

Traditionally linked to calm, soothing, wind-down experiences.

DRIVER TERPENES

Linalool • α -Bisabolol • trans-Nerolidol • α -Terpineol

PRIMARY Linalool

SECONDARY α -Bisabolol, trans-Nerolidol, α -Terpineol, Geraniol

TRACE Citronellol, Nerol, Geranyl Acetate

IN THIS CATALOG • 1

Sunday Driver

\$— /8th

Citrus / Bright

CITRUS • ZESTY LEMON, ORANGE, GRAPEFRUIT

Fresh-cut citrus rind, lemon zest, ripe orange. Sharp and uplifting — the brightest, most awake corner of the spectrum.

Commonly associated with bright, uplifting, social energy.

DRIVER TERPENES

D-Limonene • Valencene

PRIMARY D-Limonene

SECONDARY Valencene

TRACE α -Phellandrene

IN THIS CATALOG • 2

Kush Mints

\$— /8th

Layer Cake

\$40 /8th

Dessert / Creamy

DESSERT • VANILLA, CAKE, RICH AND SMOOTH

Vanilla, cake batter, sweet cream. Smooth and indulgent — sits on top of other profiles rather than driving them.

Often associated with smooth, mellow, indulgent relaxation.

A combination profile — it emerges from soft florals layered over sweetness and warmth, not from a single 'dessert' terpene. These strains classify Primary Floral or Spicy on a COA; the culture calls them dessert.

DRIVER TERPENES

Linalool + α -Bisabolol over a sweet, spicy base

IN THIS CATALOG • 0

Nothing in this profile right now — ask a budtender.

The Aroma Spectrum

Ten aromas, the terpenes behind each, and what's in the case right now.

Spicy / Warm

SPICY · BLACK PEPPER, CLOVE, WARM SPICE

Cracked black pepper, clove, baking spice. Warm and assertive — the only profile dominated by a single aromatic heavyweight.

Commonly linked to warming, grounding, balanced experiences.

DRIVER TERPENES

β -Caryophyllene · Caryophyllene Oxide · α -Humulene

PRIMARY	β -Caryophyllene
SECONDARY	Caryophyllene Oxide
TRACE	α -Bergamotene

IN THIS CATALOG · 2

Gorilla Glue #4

\$38 /8th

Do-Si-Dos ★

\$35 /8th

Herbal / Woody

HERB · LOOSE TEA, SAGE, FRESH-CUT WOOD

Loose-leaf tea, sage, dry hop, fresh sawn wood. Dry and savory — refined and understated, more 'considered' than loud.

Traditionally linked to mellow, contemplative, even-keeled experiences.

DRIVER TERPENES

α -Humulene · Guaiol · Fenchol · Eucalyptol

PRIMARY	α -Humulene
SECONDARY	Guaiol, Fenchol, Borneol, Eucalyptol
TRACE	Phytol, Isopulegol, Pulegone, Menthol, α -Cedrene, Sabinene Hydrate

IN THIS CATALOG · 0

Nothing in this profile right now — ask a budtender.

Piney / Fresh

PINE · PINE, FIR, CRISP MOUNTAIN AIR

Pine needle, Douglas fir, crisp mountain air. Sharp and resinous — clean, bracing, often invigorating.

Often associated with clear-headed, alert, focused energy.

DRIVER TERPENES

α -Pinene · β -Pinene · Camphene · Δ -3-Carene

PRIMARY	α -Pinene, β -Pinene
SECONDARY	Camphene, Δ -3-Carene, Sabinene
TRACE	γ -Terpinene, α -Terpinene

IN THIS CATALOG · 0

Nothing in this profile right now — ask a budtender.

Tropical / Tangy

TROPIC · MANGO, GUAVA, SUN-RIPENED FRUIT

Mango, guava, passionfruit. Exotic and tangy — vibrant fruit you'd find in a juice bar, not a pie.

Often described as vibrant, playful, and energizing.

DRIVER TERPENES

β -Ocimene · Terpinolene · Valencene

PRIMARY	β -Ocimene
---------	------------------

IN THIS CATALOG · 0

Nothing in this profile right now — ask a budtender.

PRIMARY

Myrcene EARTH

Earthy, musky, ripe mango, clove

Most abundant cannabis terpene; sets a heavy grounding base and amplifies overall aromatic weight.

LEADS · JELLY BREATH

D-Limonene CITRUS

Citrus, lemon, orange peel

Defines bright citrus character; with caryophyllene and myrcene it turns the corner into gas.

LEADS · SUNDAY DRIVER · KUSH MINTS

The Aroma Spectrum

Ten aromas, the terpenes behind each, and what's in the case right now.

PRIMARY

β -Caryophyllene SPICY

Black pepper, clove, warm wood

The pepper backbone; aromatically loud, so even moderate levels drive a clear spice/gas lead.

Linalool FLORAL

Lavender, floral, sweet spice

Potent at low levels; a little linalool softens and perfumes the whole profile.

α -Pinene PINE

Pine needle, fresh, sharp

Crisp pine sharpness; cuts through heavier terpenes and reads as fresh and bright.

β -Pinene PINE

Pine, dill, woody-herbal

Pairs with α -pinene for forest character with a slightly more herbal, resinous edge.

Terpinolene FRUIT

Fruity, floral, piney, fresh

Complex and volatile; a terpinolene lead signals bright, fruity-fresh 'haze' character.

α -Humulene HERB

Hops, woody, dry earth

Travels with caryophyllene; adds a dry, hoppy woodiness and depth to gassy profiles.

β -Ocimene TROPIC

Sweet, herbal, tropical

Sweet tropical lift; pushes a profile toward exotic, fruity-floral territory.

SECONDARY (IMPACT)

α -Bisabolol FLORAL

Chamomile, soft floral, sweet

Smooth, delicate floral; a marker of refined, premium-feeling profiles.

Valencene CITRUS

Sweet orange, grapefruit

Juicy citrus top-note; lifts and rounds out limonene-forward profiles.

SECONDARY (IMPACT)

trans-Nerolidol FLORAL

Apple, rose, woody bark

Soft woody-floral bridge; adds depth and a fresh-bark finish.

Guaiol HERB

Pine, rose-wood, cooling

Rare woody-cooling note; signals a distinctive, structured profile.

α -Terpineol FLORAL

Lilac, pine, clove

Soft lilac-pine; smooths transitions between floral and resinous notes.

Caryophyllene Oxide SPICY

Dry pepper, oxidized wood

Oxidation marker of caryophyllene; dry, savory-spice edge.

β -Farnesene FRUIT

Green apple, woody, faint citrus

High-mass but aromatically quiet — can top a COA by quantity yet barely shape the nose. Low potency keeps it from hijacking the classification.

α -Farnesene FRUIT

Green apple skin, woody, citrus

Apple-skin top note found in many modern crosses; subtle even at high concentration.

Camphene PINE

Damp fir, camphor

Cool resinous fir; deepens the piney structure.

Δ -3-Carene PINE

Sweet pine, cedar, lemon

Sweet-resinous; bridges pine and citrus with a cedar finish.

Geraniol FLORAL

Rose, geranium, sweet

Bright rose-floral; potent and instantly recognizable.

The Aroma Spectrum

Ten aromas, the terpenes behind each, and what's in the case right now.

SECONDARY (IMPACT)

Fenchol HERB

Basil, camphor, lemon-earth
Earthy-herbal pivot; common in basil-leaning profiles.

Borneol HERB

Camphor, mint, herbal
Cooling camphor-herb; lends a medicinal-herbal crispness.

Sabinene PINE

Peppery, woody, citrus-spice
Spicy-woody freshness; adds peppery complexity to pine.

p-Cymene GAS

Pungent, solvent, citrus-spice
A genuine gas marker, but usually present in small amounts — a confirming note, not the main driver of fuel character.

Eucalyptol HERB

Eucalyptus, mint, cooling
Cooling lift; primary driver of the Clean / Fresh modifier.

TRACE

Citronellol FLORAL

Rose, citrus, soft floral
Trace rose-citrus nuance; rounds floral tops.

Nerol FLORAL

Sweet rose, fresh citrus
Trace sweet-floral lift.

Phytol HERB

Balsamic, green, faint floral
Trace green-balsamic; a backdrop note, not a lead.

Isopulegol HERB

Mint, cooling, herbal
Trace minty-cool note; reinforces Clean / Fresh modifier.

TRACE

Pulegone HERB

Minty, camphor, herbal
Trace mint-camphor; supports cooling character.

Menthol HERB

Cooling mint
Rare cooling trace; strong Clean / Fresh signal when present.

α -Cedrene HERB

Cedar, dry wood
Trace cedar nuance; deepens woody structure.

α -Bergamotene SPICY

Warm wood, faint tea
Trace warm-wood spice.

α -Phellandrene CITRUS

Mint-citrus, peppery
Trace minty-citrus pepper.

γ -Terpinene PINE

Fresh, woody-citrus
Trace fresh-woody lift.

Sabinene Hydrate HERB

Marjoram, fresh herb
Trace fresh-herb nuance.

Geranyl Acetate FLORAL

Rose, sweet fruit, floral ester
Trace sweet-rose ester; lifts floral and candied tops.

α -Terpinene PINE

Fresh citrus, woody-pine
Trace fresh-citrus pine; common alongside terpinolene.
